CENTER

about the program...

brief overview

Landscaping and Design Technologies offers the opportunity for students to become green industry specialists in one of America's fastest growing fields. Training includes landscape design, construction and maintenance for residential and commercial properties. Additionally, students learn hands on plant growth and reproduction under field and greenhouse conditions. Creativity will be emphasized in indoor and outdoor settings through floral design & interior and exterior landscape planning. Using outdoor power equipment such as commercial mowers, tillers, front loaders, and backhoes allows students to develop talents needed in industry. As with all areas of the green industry, sales and customer service are key and hands on marketing experience is abundant at TCTC.

what you'll learn

- Landscape Installation/Construction
- Marketing & Customer Service
- Landscape Maintenance
- Greenhouse & Nursery Management
- Outdoor Power Equipment Operation
- Floral Design
- Plant & Environmental Science
- FFA Leadership Activities
